

**TO THE CHAIRMAN AND MEMBERS  
OF BARTON PARISH COUNCIL**

**Pooley Bridge Neighbourhood Watch - Report No. 26**

**Crime Statistics**

The twelve months running total to the end of May, 2016, shows an increase of only one over the position at the end of last year, which was the lowest rate over the five year reporting period. Appendix 1 summarises the movement monthly. There have been 8 crimes reported in the last three months and half of these were outside of the village, "near to the Ferry Terminal, Waterfoot and the B5320". Appendix 2 details the trend over six years.

**Neighbourhood Watch National Week - June 2016**

As part of a national promotion of the NW we have now received new NW stickers and a limited number of the new NW booklets to distribute to members and potential new members.

**Barton Community Resilience Group**

There has still not been any feedback from a survey of Finkle St./Crown Square drainage issues (first agreed to in early May 2015). However CCC have distributed leaflets around the Village advertising the Pooley Bridge Flood Meeting this Thursday. A presentation of the Draft Report for Pooley Bridge, detailing the proposals for future flood resilience, will follow the flood fair which begins at 6.00pm.

Hopefully this will provide encouragement for our community to consider an effective planned resilience path, en route drawing up a Community Emergency Plan.
